Duluth, GA 30096

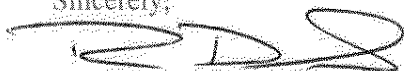

Dear Malcom,

About two months ago, we installed the E-Pump into our hotel and are very pleased with the results we have been receiving. Our hot water complaints have gone down substantially and our monthly natural gas bill, on average, was **reduced by 20.8 %**. This figure is over and above what our 3 late model, 199,000 btu, 98 % efficient A.O. Smith commercial boilers give us. Even with the 68 more rooms rented and the water usage at 10k gallons more for the month, we still saved over 100 therms of natural gas.

We here at LaQuinta Inns appreciate your company's professionalism in your sales approach and also with your timely follow up with us to address our questions or concerns after the installation of your pump.

We look forward to working with you in the future and will not hesitate to recommend the Enovative Group and you're E-Pump to any hotel or facility owner that relies on boilers and recirculation pumps to deliver hot water and is looking to increase their bottom line. **It saves us money!**

Sincerely,

Robert Debs
